Mitsubishi Electric Mobility's Approach to Health and Productivity Management

Corporate Philosophy

We contribute making prosperous mobility society come true by intensifying and innovating our technology, and endlessly taking up a challenge of creation.

Core Principles of Safety and Health

2. As a company delivering products that demand the highest level of safety in the mobility sector, we prioritize safety in every aspect of our business, from development and design to manufacturing.

Core Policy on Safety and Health

- 1. Establish a culture where safety and health are the highest priority, regardless of social or business circumstances.
- 2. Promote a comprehensive approach to health and productivity management, creating a workplace where everyone can maintain their physical and mental health and work with vitality.

Long-Term Safety and Health Initiatives

- 1. Cultivate a culture where every employee takes ownership, thinks proactively, and prioritizes safe actions.
- 2. Ensure the reliable implementation of the occupational health and safety management system.
- 3. Enhance employee health and promote health and productivity management through Mitsubishi Electric Group's MHP "Iki-Iki Waku-Waku ACTION".

Mitsubishi Electric Mobility's Health and Productivity Management Commitment

Human capital / Health and Productivity Management

As part of the Mitsubishi Electric Group, Mitsubishi Electric Mobility views employee safety and health as the foundation for a diverse and thriving human capital. The company is dedicated to creating a work environment where employees can thrive both physically and mentally, actively promoting health and productivity management initiatives.

Mitsubishi Electric Mobility's Health and Productivity Management Commitment

Mitsubishi Electric Mobility is committed to provide solutions to social challenges through our businesses, guided by its corporate philosophy: we contribute making prosperous mobility society come true by intensifying and innovating our technology, and endlessly taking up a challenge of creation.

Human capital are at the heart of this vision. Recognizing that a diverse and skilled human capital is the foundation of all business operations and a key driver of competitiveness, the company is dedicated to creating an environment where employees can thrive. As part of this commitment, employee safety and health are top management priorities. By fostering a healthy and supportive workplace, the company aims to ensure that every employee can work with energy and fulfilment.

Health and Productivity Management Policy

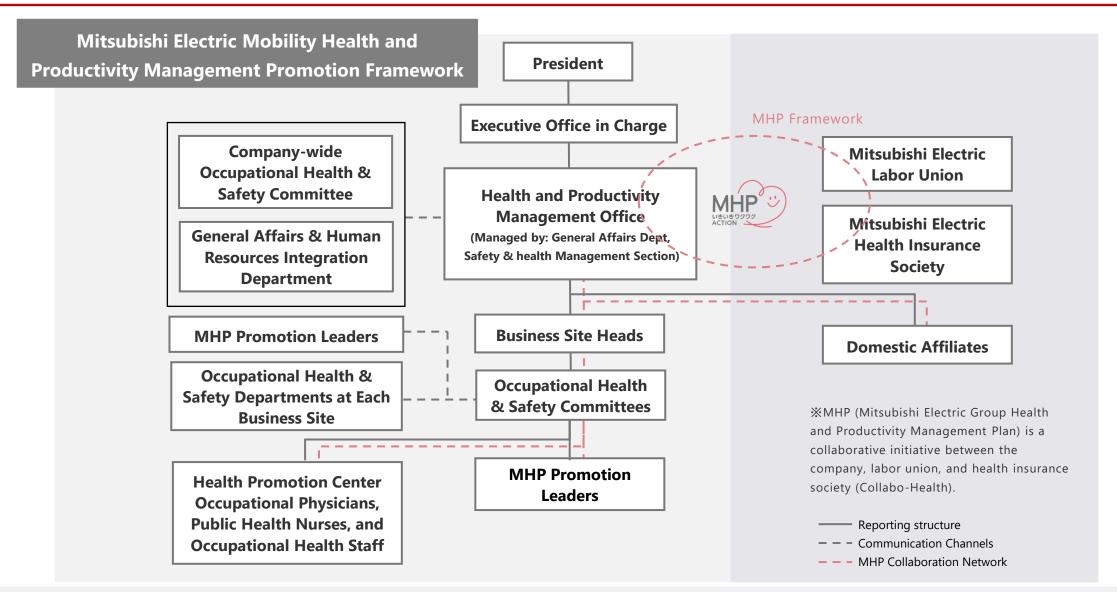

Mitsubishi Electric Mobility is committed to fostering a healthy and thriving workplace through its health and productivity management framework.

- 1. By promoting health and productivity management, the company supports "Respect for all people", a key sustainability priority.
- 2. Health initiatives are integrated with efforts to enhance workplace culture and HR policies that empower a diverse and skilled human capital, ensuring a comprehensive approach to employee well-being.

In collaboration with Mitsubishi Electric, its labor union, and the Mitsubishi Electric Health Insurance Society, the company continues to strengthen health promotion initiatives, actively supporting employees in managing their own health.

Mitsubishi Electric Mobility's Health and Productivity Management Promotion Framework

Health and Productivity Management Strategy Map

MHP "Iki-Iki Waku-Waku ACTION".

A new initiative to focus on transforming activities into those that resonate with employees and gain their support, using subjective health satisfaction — eating well, sleeping well, and good digestion — as key indicators for improvement

This initiative is built on the idea that every employee and their family members should take an active role in managing their health. Mitsubishi Electric Mobility is actively implementing MHP "Iki-Iki Waku-Waku ACTION," a health-focused initiative by the Mitsubishi Electric Group.

To support overall health and help employees lead healthier, more fulfilling lives, the initiative prioritizes enhancing health satisfaction — eating well, sleeping well, and maintaining good digestion. As part of this effort, six key lifestyle habits — nutrition, exercise, sleep, dental care, smoking, and alcohol consumption — have been identified as KPIs, with targeted actions to encourage and sustain healthier behaviors.

KPIs for the 6 Key Lifestyle Habits

Maintains a balanced diet by managing both

portion size and nutritional quality

Engages in weekly cardiovascular exercises

Walks an average of 8,000 steps or more per day

Follows habits that promote restful, high-quality sleep

Brushes teeth three times a day

Receives regular dental cleaning and plaque removal

Does not smoke

Drinks alcohol in moderation

Health Workshops & Seminars
